

ImiSight for Oil & Gas

1. Simple AOI Selection

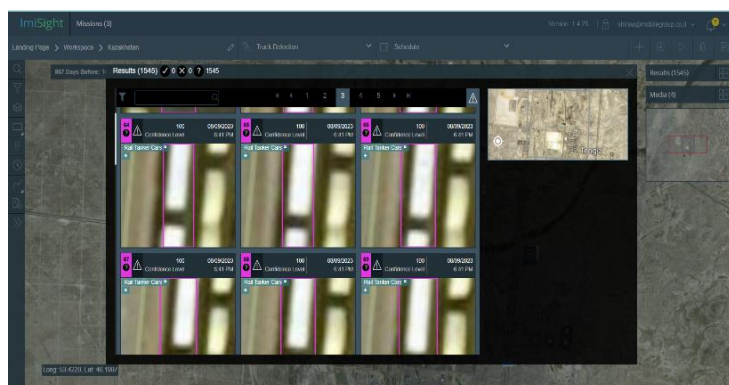

Upon selecting the area of interest (AOI) where the disaster occurred, visual imagery data from satellite, aircraft, UAV and CCTV sensors is uploaded or streamed to ImiSight.

The selected areas can be as large as entire countries or as small as a single pipeline segment.

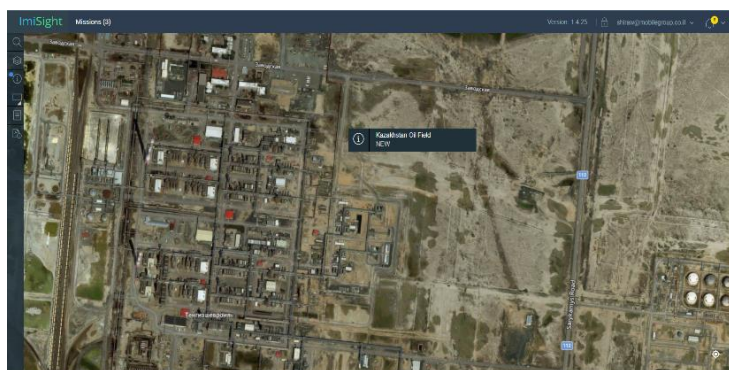

2. Automates Anomaly Detection

ImiSight detects objects and anomalies automatically - such as leaks, oil tankers and other vehicles. This allows the operators to quickly assess the events and response for preventing future damage.

3. Rapid Damage Assessment

Object and anomaly detection algorithms generate reports on detected results and analyze changes in the AOI's routine. Insights from the system are updated as new data is received.

4. Efficient Monitoring and Anomaly Detection

Periodic monitoring and anomaly detection enable operators to handle unusual activities.

- Predicting anomalies to prevent future incidents.
- Supporting installation of new pipelines underground.

Prioritizing maintenance and enforcement tasks.

ImiSight Oil & Gas generates geo-located reports, emphasizing anomalies and suspicious activity identification. Explore insights with ImiSight now.

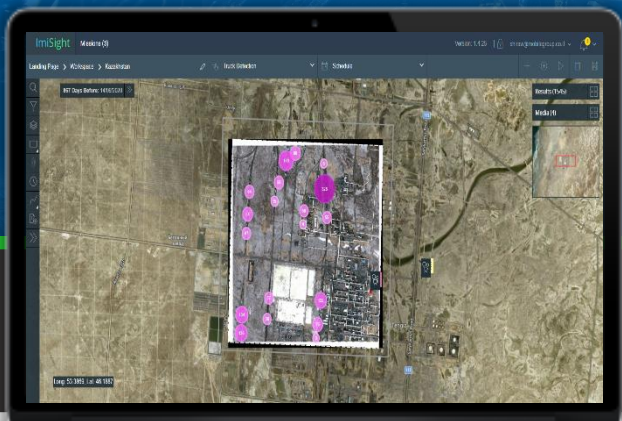

Unlock Insights with ImiSight for: **ImiSight Oil & Gas**

ImiSight Oil & Gas deploys cutting-edge AI to detect and evaluate suspicious activities at oil & gas sites for the midstream operations cycle.

Harness ImiSight for informed decision-making on pipeline installation, maintenance, or oil delivery.

Step into the future with ImiSight's AI algorithms and unlock endless possibilities with significant operation costs savings.

Experience the ImiSight Oil & Gas advantage – transform your insights today.

Suspicious Activity Detection

ImiSight's AI identifies and assesses potential threats in oil & gas sites, including oil tankers and leaks.

Informed Decision-Making

This robust detection capability empowers decision-makers to make informed choices based on invaluable insights.

Versatile Application

Whether you're responsible for pipeline installation, maintenance, or ensuring timely oil delivery, ImiSight equips you with tools to extract essential information and gain profound insights into your surroundings.
