

# ImiSight for Land Encroachment

## 1. Simple AOI Selection

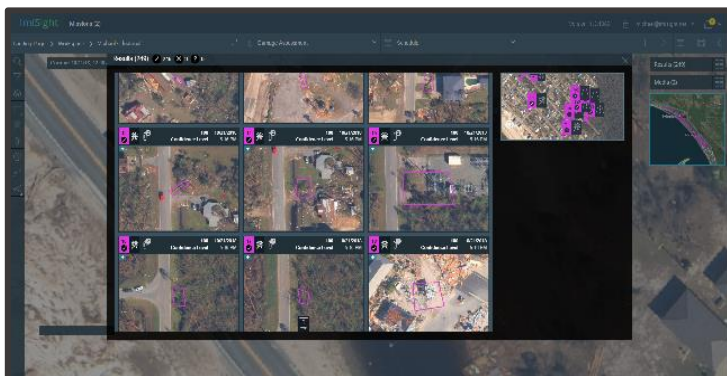

Upon selecting the area of interest (AOI) where the disaster occurred, visual imagery data from satellite, aircraft, UAV and CCTV sensors is uploaded or streamed to ImiSight.

## 2. Automatic Change and Anomaly Detection

ImiSight automatically runs object and anomaly detection algorithms and tracks changes in the AOI.

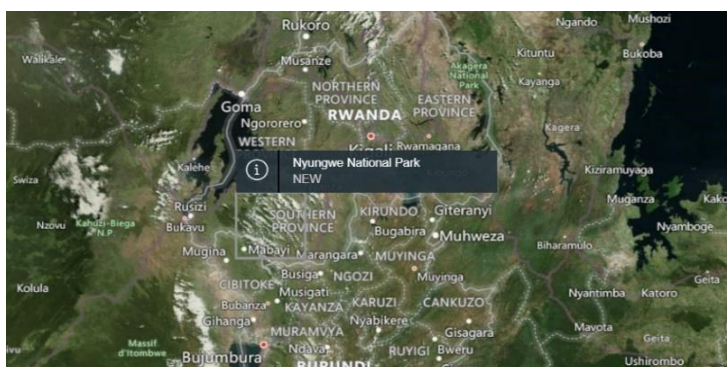

All changes to the various object types defined by the user (vegetation, persons, vehicles, buildings, etc) will be immediately highlighted.

## 3. Actionable Reports, at The Right Time

ImiSight generates reports and insights as soon as new imagery data is received.

This enables operators to assess the events and respond promptly.

## 4. End to End Land Protection Solution

ImiSight's continuous monitoring and anomaly detection helps land owners close the loop between detection and enforcement.

ImiSight creates geo-located reports, highlighting outcomes and advanced land object identification. Explore insights with ImiSight today.

# Unlock Insights with ImiSight for: Land

ImiSight Land leverages cutting-edge artificial intelligence technology to identify and assess a wide range of objects on land, from buildings to roads and vehicles.

By tapping into this robust detection capability, **we empower you to make informed operational decisions based on invaluable insights.**

ImiSight's AI algorithms and simple, powerful web interface equip city planners, transportation analysts, or environmental researchers with the tools to extract essential information and gain profound insights.

**Experience the power of ImiSight Land – revolutionize your insights today.**

## Empowering Insights for Informed Action

Leverage robust detection for actionable insights. ImiSight transforms data into informed action.

## For Every Role

City planners, analysts, researchers – access valuable information, grasp surroundings better.

## Experience the Future of Analysis

Step into the future of data analysis with ImiSight's web-based app and AI algorithms. Explore a limitless world of possibilities as you unlock the true potential of your data.
